SANI-GATE

**WALK-THROUGH SANITIZING MIST TUNNEL
INFORMATION BROCHURE**

SANI-GATE WALK THROUGH MIST SANITIZING TUNNEL

ABOUT SANI-GATE

The **Sani-Gate** sanitizing mist tunnel was designed to sanitise people in a quick effective way whilst 'on the go'.

From single users to high traffic volume areas, the **Sani-Gate** system is ideal for any congested areas where people are entering or exiting.

Our system dispenses an SABS approved non-alcohol based sanitiser that kills 99.9% of all germs, bacteria and virus'.

The system is well suited to **shopping malls, schools, hospitals, bus, train and taxi stations, manufacturing plants** and the **mining industry**

SANI-GATE

OUR SYSTEM

- The Sani-Gate misting system consists of an easy to assemble frame structure which is fully portable, and sets up in minutes.
- Whether its for portable use or a permanent install, our system caters for all.
- We also offer custom build structures on request.
- Our lightweight portable Control/Pump box uses 220v power supply and is very economical on electricity usage.
- The Sani-Gate system is 100% automated and uses motion sensors to control the dispensing of the sanitiser.
- The system consistently dispenses approx. 35ml of sanitiser per person, ensuring the consumption remains economical.
- The system can effectively sanitize approx. 720 people per hour

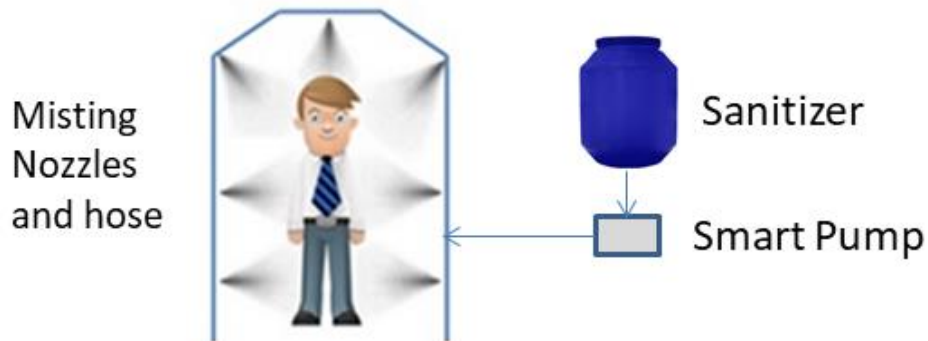

SANI-GATE

SANI-GATE MISTING SYSTEM

Our standard system consists of the following elements:

- 2m (L) x 1.2m (W) x 2.2m (H) easy to assemble mild steel frame
